PRODUCTS AND TECHNOLOGIES

Thanks to its machinery performance FMC can produce capsules, tablets and granulates. Exploiting its best technologies FMC ensures the highest quality for innovative and safe products.

■ TABLETS

FMC can produce tablets of different shapes, size and types: swallowable, chewable, oro-dispersible, coated and timed release tablets

■ CAPSULES

FMC can produce animal, vegetal and acid-resistant gelatin hard capsules

■ MIXTURES AND GRANULATES

FMC can produce mixtures, granulates and effervescent granulates achieved thanks to its state-of-the-art technology such as wet and melt granulation

■ BOTTLES

FMC packages tablets, capsules and softgel capsules, in glass bottles of various size with aluminium-ringed cap and white PE bottles with pressure cap and warranty seal

■ BLISTER

FMC packages tablets, capsules and soft gel in PVC ALUMINIUM (Duplex Triplex) and ALU/ALU blisters ensuring quality and safety

■ QUALITY

With its internal laboratories FMC performs microbiological analyses (total plate count, yeasts and moulds) on all production batches, feasibility studies and accelerated stability tests.

A YOUNG FIRM LOOKING INTO THE FUTURE

FMC was founded in May 31st, 2000 by **Dr. Francesco Maria Cappucci**, pharmacist, always passionate about genelenal preparations.

Today FMC is a leading firm in the production and packaging of food supplements, capsules, powders, effervescent granulates, blisters, bottles, sachets and cases. A 50 people's team of highly qualified personnel grants a full support to its clients, assuring quality, regulatory and formulation assistance, research and development.

Its brand new, modern and efficient manufacturing plant was inaugurated in September 2019 with a surface of 4800 meters square, 1200 of which destined to production and packaging; FMC Clean Room was built following pharmaceutical standards.

PRODUCTION

Granulates / Tablets / Capsules

FMC can produce mixtures, granulates, tablets (swallowable, chewable), vegetal and gelatin hard capsules, in separate departments and always in compliance with hygienic and sanitary standards, using cutting-edge machinery such as electronic check-weighing tablet press B&D and capsule filler ZANASI/IMA for capsules type "0" and "4"

PACKAGING

Blisters / Vials / Sachets / Cases

FMC can ensure the packaging of tablets, capsules and softgel capsules both in bottles and in blisters. A new packaging department for granulates and effervescent granulates in sachets and cases is also fully operative.

RESEARCH AND DEVELOPMENT

Technological laboratory

FMC policy consists in collaborating and helping its clients in every step, from scratch to the final product. This is why FMC has invested many resources to implement its R&D department, providing it with modern laboratories where a team of experts develops innovative formulations.

ANALYSES LABORATORY

Microbiological analyses

FMC laboratory has been active since October 2014. The facility has state-of-the-art instruments able to analyze various food matrices (capsules, tablets, powders). The laboratory is equipped to ensure analyses sterility, precision and accuracy.

5.000.000 TABLETS
daily produced

2.500.000 CAPSULES
daily produced

100.000 CASES
daily produced

200.000 BLISTERS
daily produced

120.000 SACHETS
daily produced

4.000 MICROBIOLOGICAL ANALYSES
performed every year
